1. A way to count part of something
2. The size of a surface $a = \pi r^2$
3. Like fractions because they count part of something
4. formed by taking 2 circles, putting one above the other, and wrapping a surface around to connect the edges
5. A three dimensional circle
6. The relation between two or more values
7. The amount of space inside of something like a sphere
8. Ratio of the circumference of a circle to its diameter $\pi = C/d$
9. A plane shape bounded by a continuous line that is always the same distance from the center
10. Half the diameter of a circle $r = d / 2$
